Professional Summary

Computer Science undergraduate specializing in **Artificial Intelligence & Analytics** with strong knowledge of **Java, Python, JavaScript, REST APIs, and Software Development**. Hands-on experience in **Research & Development (R&D), AI-Powered Applications, Software Testing, Debugging, Hardware-Software Integration, and Real-Time Systems** through internships and academic projects. Strong Problem-Solving skills with a passion for developing Quality Software and Innovative Solutions.

Education

MIT ADT University, Pune B.Tech in Computer Science (AI & Analytics)	2023 – Present CGPA: 8.14
New Arts, Commerce and Science College, Shevgaon Higher Secondary Certificate (HSC)	2021 – 2023 81.33%
Balasaheb Bharde High School, Shevgaon Secondary School Certificate (SSC)	2020 – 2021 88%

Internship Experience

Embedkari Pvt. Ltd. – Embedded Systems Intern	2025
• Assisted in embedded software development, debugging, hardware-software integration, and system testing.	
Innobytes – Full Stack Development Intern	2025
• Developed responsive web applications using React.js, JavaScript, and REST APIs.	
• Built reusable UI components and integrated backend APIs for scalable applications.	

Projects

Smart Traffic and Parking Management System	2026
• Designed and developed an AI-powered traffic and parking management solution using Python and Machine Learning.	
• Built intelligent dashboards for real-time monitoring, analytics, and decision support.	
• Applied predictive analytics and automation to improve traffic flow and parking utilization.	
CrowdFlow Analytics System	2025
• Developed a real-time crowd monitoring system using Python, YOLOv5, and Computer Vision.	
• Built scalable analytics dashboards for live crowd monitoring and intelligent decision support.	
• Optimized object detection for accurate real-time performance.	
AyuBarter	2025
• Developed a healthcare platform using React.js, JavaScript, and REST APIs.	
• Integrated AI-powered recommendation features and backend APIs.	
• Improved application usability through scalable and reusable frontend components.	

Technical Skills

Programming Languages: Java, Python, JavaScript, SQL
AI/ML: Machine Learning, Computer Vision, Generative AI, Prompt Engineering, AI Agents
Web Technologies: React.js, HTML, CSS, REST APIs
Database: MySQL, MongoDB
Cloud: AWS Cloud Foundations
Data Analytics & Productivity Tools: MS Excel, Power BI, Tableau, Google Sheets, PowerPoint
Tools: Git, GitHub, VS Code, Google Colab

Publications

Pune Smart City: An AI & IoT Based Smart Traffic & Parking Management System for Pune City	2026
Research publication on AI, IoT, predictive analytics, and intelligent transportation systems.	
AyuBarter: AI-Integrated E-commerce & Tele-Consultation Platform	2025
Research publication on AI-powered healthcare recommendation and tele-consultation systems.	

Certifications

- AWS Academy – Cloud Foundations
- Advanced Java Programming Certification
- Microsoft (InternForte) – Artificial Intelligence
- DeepLearning.AI – Neural Networks and Deep Learning
- Meta – GenAI in Data Analytics
- IBM – Introduction to Artificial Intelligence
- Google Cloud – Introduction to Generative AI

Achievements

- Published two research papers in AI, IoT, and Healthcare.
- Completed internships in Embedded Systems and Full Stack Development.
- Participated in ByteCamp, HackPrix, and Smart India Hackathon.
